I design high-trust financial tools for advisors and their clients. Currently at Alphanso, building the product and the design system it runs on.

PROFESSIONAL EXPERIENCE

UI/UX Designer / Alphanso

Feb 2024 – Present

Gurgaon, India • Wealthtech / B2B SaaS

DESIGN SYSTEM

- Built the component library from scratch — 80+ components across tables, inputs, buttons, navigation, and feedback, so engineering could ship new surfaces without returning to design
- Defined the token system: color, type scale, corner radius, and shadow, so every surface stayed visually consistent without individual review

PRODUCT WORK

- Sole designer across the full product surface: advisor tools, client flows, mobile to desktop, from research to production specs
- Worked directly with the co-founder and advisors; design shaped what got built, not just how it looked

Visual Designer / Cossouq

Jul 2022 – Feb 2024

Ahmedabad, India • E-commerce

WEB DESIGN

- Designed and built the marketing website — layout, typography, and responsive behaviour across breakpoints

VISUAL STORYTELLING & VIDEO

- Created brand visuals, campaign graphics, and social content with a consistent visual language across every touchpoint
- Produced and edited product and brand videos — scripting, cuts, motion, and final delivery

SKILLS

📁 Product Design

End-to-End Product Design

Interaction Design

Information Architecture

Design Systems

Responsive & Mobile

🔍 Research & Strategy

User Research

Usability Testing

Data-Informed Design
